**KOAGAMIN®**

4 min. and contains 32% mg. ethyl oxalate, 54 mg. ethyl malonate, 35.7% ethyl alcohol in propylene glycol.

New convenience to control bleeding and seepage in oral surgery...exodontia...immediate dentures...perioperative scaling...Administered sublingually: no irritation...no prolonged pre and postoperative oral medication...no introduction of foreign substances. While there has been a report of untoward reactions with KOAGAMIN, care should be taken when administering it to patients with a predisposition to rhinobius.

NEW  
**WORK-MODEL  
FORMERS**

allow immediate pouring of models  
without boxing-in of impressions

Tray containing the impression is set into the proper size rubber mold. Stone or plaster is poured over the impression, producing a neat, smooth, accurate model. No waste of time or material.

The outfit consists of 4 sets of different sizes of upper and lower formers, useable with any standard make of impression trays and with all kinds of impression materials.

**CATALOG NO. 910 . PRICE \$20.**

Catalog No. 33 describes many useful models and accessories. If you do not have a copy write for one today.

DURA-BLEND Veneers

LABIAL VIEW

### New Myerson Development for Superior Esthetics in Crown and Bridge Cases

This newest product of Myerson research is a prefabricated labial veneer which provides crown and bridge restorations with built-in shade accuracy, predetermined natural blending of dentine and incisal materials, and beautiful precarved labial surfaces. ■ Made of the same materials as the famous Dura-Blend Anterior Teeth, Dura-Blend Veneers are available in all thirteen natural Myerson shades. ■ On your next acrylic crown and bridge case, use your Myerson Shade Guide and specify Myerson Dura-Blend Veneers to your Laboratory. You can be confident that the shade will be accurate and that the esthetics will please both you and your patient.
